

PAYOFF & TAKE-UP SYSTEMS FOR THE SEMI-AUTOMATED MANUFACTURING PROCESS

ROTACC

PV und TV 1120

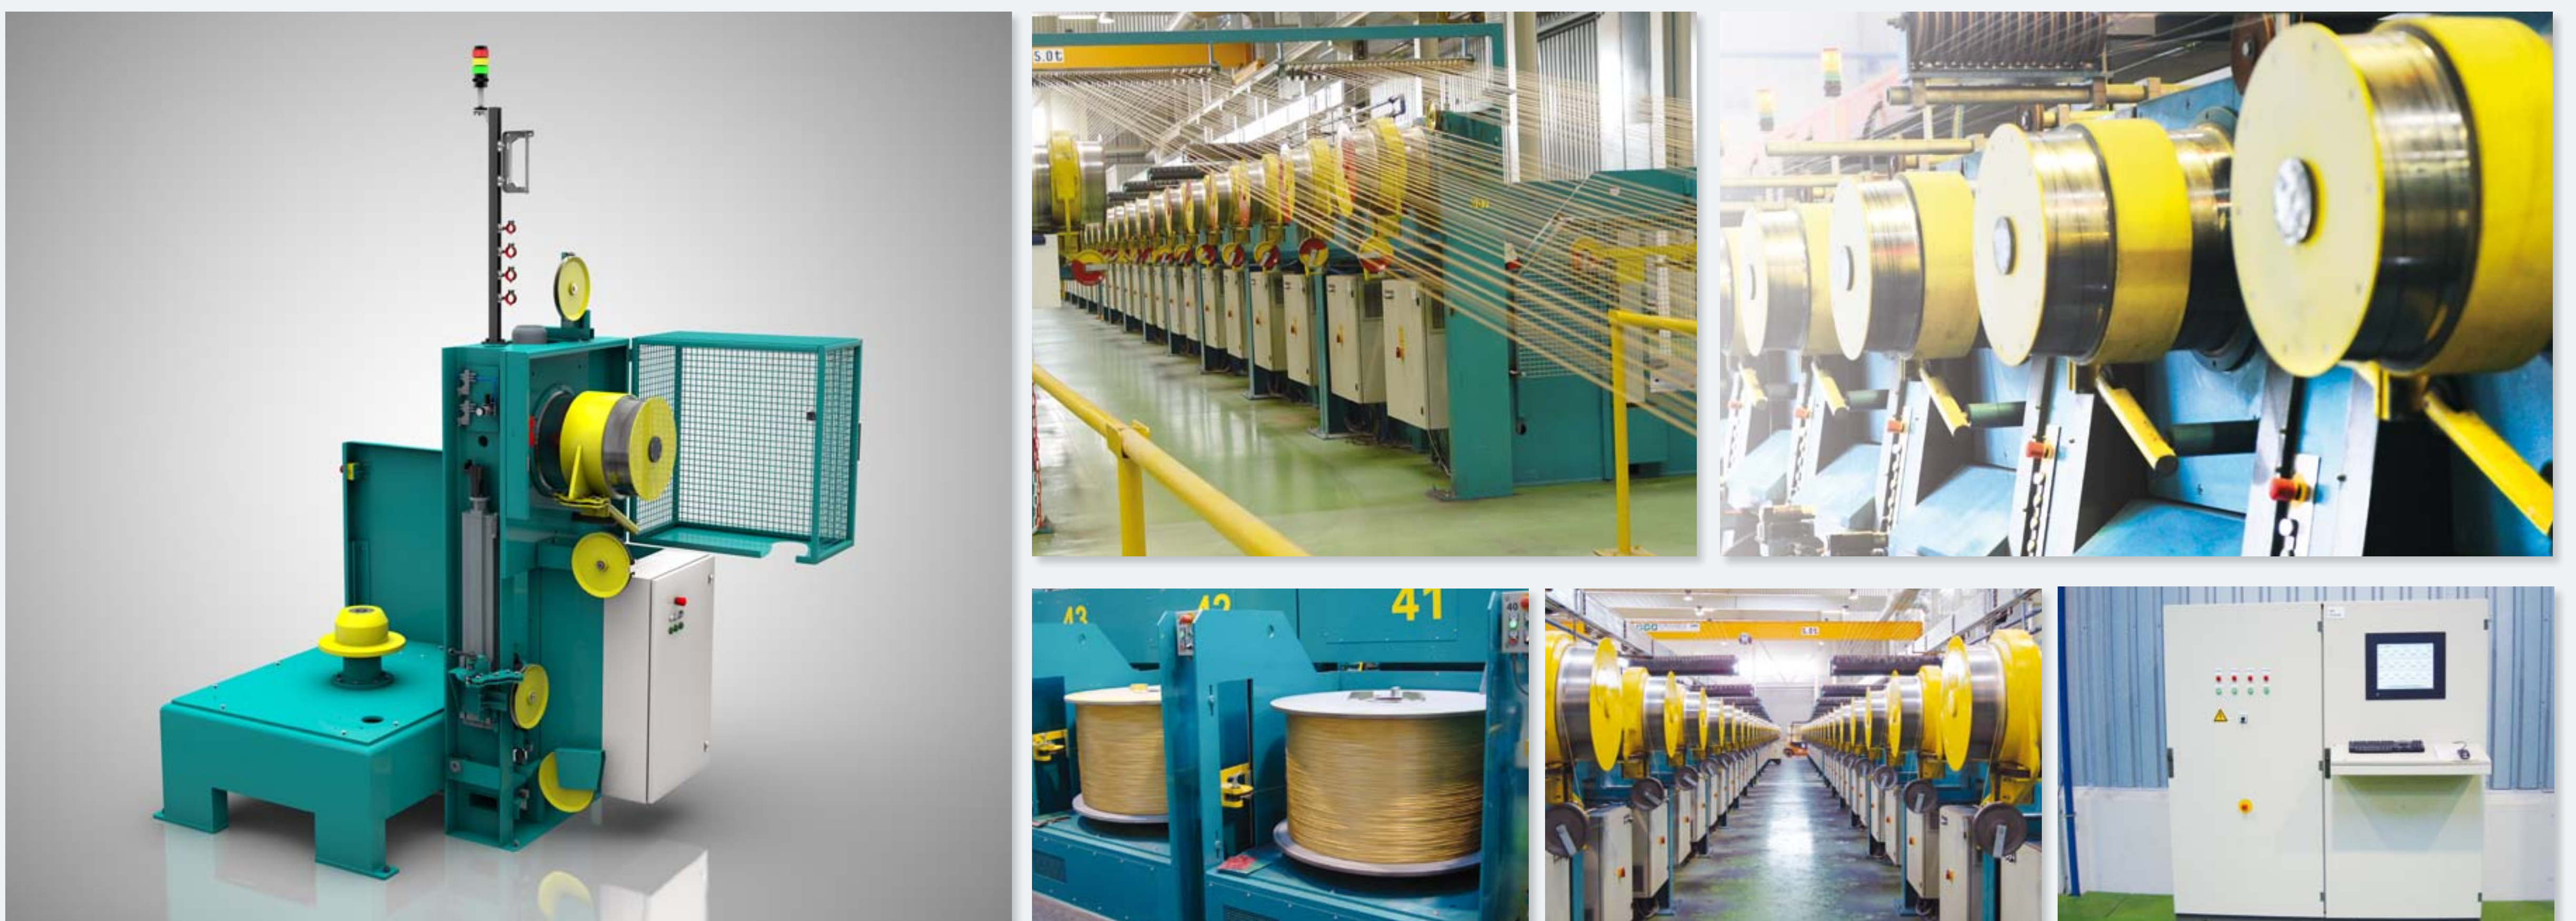

HIGH PERFORMANCE THROUGH AUTOMATION

Tandem disc-accumulation-payoffs and take-ups

Efficient and error-free process guaranteed due to the separation of operating side and un- or uploading side (human and machine) with automated guided vehicles (AGV).

Additional functions and advantages:

- Lean Production: Cost reduction through reduced manpower requirements
- Pneumatically driven, electrically controlled dancer
- Automatic specification of velocity and wire tension for various machines via the Manufacturing Execution System (MES) combined with the opportunity of operating the whole plant "recipe-controlled"
- Partly automated spool change
- No need to take additional safety precautions due to the separation of operating side and un- and uploading side

TECHNOLOGIES FOR EXCELLENCE
