

CABLING – BUNCHING AND STRANDING MACHINES

TAUROPO

- Double twist machines in modular design
 - Take-up unit according to the double twist principle with or without over twister
 - Take-up unit with straighteners in two levels
 - Rotating core payoff unit
 - Rotating payoff unit for single wires
 - Static payoff unit
 - External over twister
 - Lay plate
- Configurable as buncher, strander and cabling machine
- Slight adaption to different cable and strand constructions
- Manufacturing of 3+6 and 3+9 constructions in one operation step
- Tensile strengths up to 3400MPa as a standard feature
